## **Abstract of JP 9284734 (A)**

**PROBLEM TO BE SOLVED:** To obtain program information quickly and accurately. **SOLUTION:** An area X1 to display a day and a weekday is arranged to a left end on a screen and an area X2 to display a time is arranged to the right. An area Y to display a program title or the like is arranged to the right side of the area X2 and an area Z to display a genre is arranged to the right. Information sets displayed on each area are arranged in a line in the longitudinal direction and information of a desired program is selected by moving cursors 100X1, 100X2, 100Y and 100Z of the respective areas.
